

BIOGRAPHICAL SKETCH

Diganta Misra

Research Student and Founder
MILA/ Landskape/ VITA/ Morgan Stanley
Montréal, Quebec
Canada

Email: diganta@landskape.ai
Web: <https://digantamisra98.github.io/>
Github: <https://github.com/digantamisra98>
Blog: <https://blog.paperspace.com/author/diganta/>

(a) Education

MILA	Montréal, Canada	Machine Learning	Research MSc, 2023 (Advisor - Irina Rish)
UdeM	Montréal, Canada	CS	MSc, 2023 (Advisor - Irina Rish)
KIIT	Bhubaneswar, India	EEE	B.Tech, 2020 (Advisor - Bhargav Appassani)

(b) Experience Overview

2022 – present	Researcher, Morgan Stanley
2021 – present	Visiting Research Scholar, VITA (UT-Austin)
2020 – present	Research Associate, Laboratory of Space Research - Hong Kong University
2019 – present	Founder and Researcher, Landskape
2020 – 2021	Machine Learning Engineer, Weights & Biases
2020 – 2021	Deep Learning Content Developer, Paperspace
2018 – 2018	Deep Learning Research Intern, Bennett University
2018 – 2018	Data Science Intern, CSIR-CDRI
2018 – 2018	Intern, Indian Institute of Technology - Kharagpur
2017 – 2017	Exchange Student, Bangkok University

(c) Research and Professional Experience

Researcher, Morgan Stanley

Building the largest open-source time-series transformer API along with scaling laws analysis with [Kashif Rasul](#). Under [Sahil Garg](#), I am working on developing novel model based high dimensional clustering with applications in task boundary absence based continual learning for timeseries.

Visiting Research Scholar, VITA, UT-Austin

Working under the guidance of [Dr. Zhangyang Wang](#) and [Tianlong Chen](#) on constructing progressive pruning approaches in sequential learning regime under resource constraints.

Founder, Landskape

Landskape is a small deep learning fundamental research group I founded in September 2019 along with the help of Kris Akira Stern (HKU).

At Landskape, we work on deep learning theory, optimization, attention mechanisms, non-linear dynamics, continual learning and efficient network design.

Our group includes students and researchers from MILA, UIUC, IIT-G, KAIST, HKU and CMU with collaborators from Google Brain, Imperial College and NUS.

At Landskape, I am principally supervised by [Assc. Prof. Jaegul Choo \(KAIST\)](#).

Visit our [website](#) for further details on publications and members/ affiliates.

Machine Learning Engineer, Weights & Biases

Working in the Frameworks and Integration team. As a Machine Learning Engineer, I primarily focus on ensuring seamless integration of the W&B API into several deep learning frameworks.

Also responsible for reproducibility pipelines.

Research Associate, Laboratory of Space Research - Hong Kong University (LSR-HKU)

Working on Planetary Nebulae analysis using deep learning and computer vision based approaches. Our goal is to use generative modelling to understand the different structural variations of PNe as well as constructing an end-to-end pipeline for visually analyzing PNe as well as develop their spectrum profiles.

Mentored by [Prof. Quentin A. Parker](#).

Visit my LSR Profile on the HKU LSR directory [website](#).

Deep Learning Content Developer, Paperspace

Working on constructing extensive reviews of state of the art and novel papers in the domain of computer vision along with code implementation in PyTorch using the resources offered by Paperspace Gradient. Currently involved in constructing a blog series on *Attention Mechanisms in Computer Vision* along with reviews of papers from CVPR and ECCV 2020. Authored articles can be viewed on my [profile](#).

Deep Learning Research Intern, Bennett University

Successfully completed the *NVIDIA DLI workshop* and the *Artificial Intelligence and Deep Learning Workshop* by Bennett University in collaboration with University College London and AWS Educate. I worked as the group leader of a team of five under the co-supervision of [Prof. Dr. Deepak Garg](#) and [Dr. Suneet Gupta](#). I was a part of 2 research projects during the duration of the internship which include:

- Class imbalanced visual recognition of galaxy images.
- Fine grained classification of crop based diseases.

The projects included documentation and final week panel presentation.

In addition, I was selected to be a part of the [LeadingIndia.AI](#) team where I supervised the hands-on labs for workshops conducted at *Galgotias University* and *Charusat University* along with conducting basic AI training sessions.

Further, I was invited as a collaborator for a project “Large-Scale Meta-Analysis of Genes Encoding Pattern in Wilson’s Disease” with *Indian Institute of Technology, Varanasi (IIT-BHU)* under the supervision of [Dr. Amrita Chaturvedi](#).

Data Science Intern, CSIR-CDRI[†]

During this internship, I was involved in building the analytical pipeline, data collection, pre-processing of data, cleaning of data, Geo-spatial Analysis of data and Document writing for the project on understanding demographics of Venture Capital and Early Seed Investments. As a part of a team of three, I was advised and mentored by [Dr. Sukant Khurana](#).

[†] Council of Scientific and Industrial Research - Central Drug Research Institute.

Intern, Indian Institute of Technology - Kharagpur

Studied basic algorithmic techniques using functional programming languages - Lisp and Prolog under the guidance of [Assc. Prof. Pawan Kumar](#).

Exchange Student, Bangkok University

Served as a primary instructor for cultural engagements along with teaching basic english and computer science to primary grade students at RangsonWittaya School, Nakhon Sawan under the [AIESEC](#) SDG #4 programme. Was also part of culture exchange, entrepreneurship and social service programs at Bangkok University.

(d) Publications ([Google Scholar](#))

1. **Diganta Misra, Mish: A Self Regularized Non-Monotonic Activation Function**, Published at the *31st British Machine Vision Conference (BMVC)*, 2020.
2. **Diganta Misra, Trikey Nalamada, Ajay Uppili Arasanipalai, and Qibin Hou, Rotate to Attend: Convolutional Triplet Attention Module**, Accepted to *IEEE Winter Conference on Applications of Computer Vision (WACV)*, 2021.
3. **Diganta Misra, Bharat Runwal, Tianlong Chen, Zhangyang Wang, and Irina Rish, APP: Anytime Progressive Pruning**, Preprint, 2022.
4. **Diganta Misra, Rahul Pelluri, Vijay Kumar Verma, Bhargav Appasani and Nisha Gupta, Genetic Algorithm Optimized Inkjet Printed Electromagnetic Absorber on Paper Substrate**, Published at *IEEE International Conference on Applied Electromagnetics, Signal Processing and Communication (AESPC)*, 2018.

(e) Invited Talks and Podcasts

1. **Podcast - Mish: A Self Regularized Non-Monotonic Activation Function** - [Link](#)
Episode 7 with Miklos Toth on the [Machine Learning Cafe](#) podcast.
2. **Invited Talk - Mish: A Self Regularized Non-Monotonic Activation Function** - [Link](#)
Presented internally at the [Sicara](#) weekly deep learning club.
3. **Contributed Talk - Non-Linear Dynamics in Neural Networks**
Presented at the Deep Learning colloquium at the University of Athens.
4. **Invited Talk - Mish: A Self Regularized Non-Monotonic Activation Function** - [Link](#)
Presented at the [Computer Vision Talks](#).
5. **Invited Corporate Talk - Mish: A Self Regularized Non-Monotonic Activation Function**
Presented virtually at the Bangalore Robert Bosch office.
6. **Podcast - Chatting with a data Science team ft DeepWrex Technologies** - [Link](#)
Episode 20 with Ankit Jha on [The World Is Ending Podcast](#).
7. **AMA - Mish: A Self Regularized Non-Monotonic Activation Function**
Ask Me Anything (AMA) session on my research with the Weights&Biases (WandB) team.

(f) Research Interests

Sparsity	Non-linear dynamics	Sequential learning
Timeseries analysis	Group theory	Transfer learning

(g) Languages

English Odia Hindi

(h) Additional Experience

I also served as Content Writer, Growth Associate, Developer, Volunteer and Editor at firms like [Digital Vidya](#), [Digimyx](#), [COSO IT](#), Criotam Technologies Private Limited, [United Nations Volunteers \(UNV\)](#), [AIESEC Bhubaneswar Chapter](#) and [The Insider Tales](#).

(i) Projects

For projects and open source contributions, please visit my [GitHub Profile](#).

(j) Achievements and References

Complete list of achievements and certifications are available upon request.

1. **DIRO x Quebec Ministry of Higher Education International Students Scholarship, 2022**
2. **UNIQUE AI Excellence Scholarship, 2022**

(k) Academic Service

1. Served as the TA for INF-8225: Probabilistic Learning course offered at Polytechnique University, Montreal in Winter 2022 under Chris Pal.
2. Served as a program committee member and reviewer for CoLLA 2022.
3. Organized and led the W&B x ML Reproducibility Challenge Winter and Spring 2021.
4. Organizer of the DL Theory reading group at MILA.
5. Selected as an entrepreneur in residence for the MILA Winter Entrepreneur Cohort 2022.
